

IN MEMORIUM

KENT BINGHAM

Our friend and colleague recently passed before he was able to complete his calling. I have kept his work on my website for five years as we collaborated on the Oasis Machine, SmartSkyways and the Oasis Village. Kent believed in spreading his work out as open source and I'm sure there is much out there that I have been unable to collect. I hope this slide show will stimulate his colleagues into sending any important work that he would have liked to have distributed as open source. Over the coming months, we should dialogue on how to create a lab that continues to grow seeds that he planted.

A
Celebration
OF LIFE

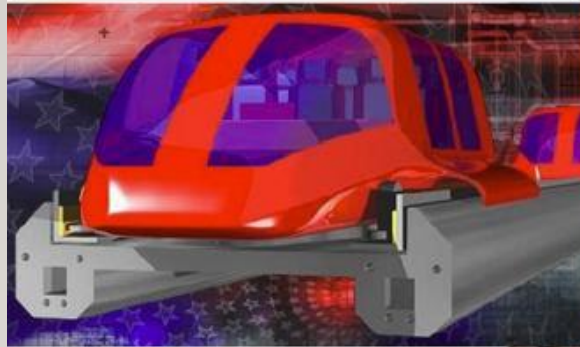

December 15, 1935 to March 27, 2018
